

ClaimFlow

Insurance claim processing — visual walkthrough

16 screenshots from the real running product, in the order a user meets them

Claimant files and tracks → adjuster assesses and decides → supervisor oversees

1 · Public home page

The front door — no login needed to start.

- File a claim and Track a claim are the two actions a visitor sees.
- Everything behind this page requires sign-in through Keycloak SSO.

2 · File a claim — step 1: who is covered

The claimant identifies their policy.

Report a loss

1 Your policy

2 What happened

Tell us what happened and we'll issue a claim number straight away. You'll be able to track the claim from the moment it is filed.

1 Your policy

Enter the details exactly as they appear on your policy document so we can match your record.

Policy number

POL-10001

Found at the top of your policy document.

Policyholder name

Ada Lovelace

Policyholder email

ada.lovelace@example.test

Continue

- Policy number, holder name and email are entered here.
- The system checks the policy exists and is active before letting you continue.

3 · File a claim — step 2: what happened

The loss itself, in plain language.

1 Your policy

2 What happened

Tell us what happened and we'll issue a claim number straight away. You'll be able to track the claim from the moment it is filed.

2 What happened

A description of the incident helps route your claim to the right adjuster. Filing for POL-10001.

Date of loss

01/09/2026

Location

London

Evidence photos

Choose Files

No file chosen

Photos speed up your claim; you can add up to 5.

What happened?

Kitchen flooded after a pipe burst.

Remarks (optional)

Anything else the adjuster should know...

Back

Submit claim

- Loss date, location and a free-text description of the incident.
- Submitting creates the claim instantly — no adjuster touch needed yet.

ClaimFlow demo • page 4 of 17

4 · Instant claim number

Proof the claim exists, the second it is filed.

- A CLM- reference number is issued immediately.
- The status steps show the claim starting at Under review.

5 · Track your claim

What the claimant sees when they come back later.

CLM-000071	UNDER REVIEW	HLTH-PLUS	01 Sep 2026	— Open

- Newest first, each row linking to its tracking page.
- Filing a second claim takes the same two-step path as the first.

ClaimFlow demo • page 7 of 17

7 · Policy cockpit — empty state

A brand-new claimant owns no policy yet, and the screen says so honestly.

- When this claimant holds a policy, this page lists each cover with its limit, claimed and remaining benefit.
- The empty state itself proves the visibility wall: nobody ever sees another holder's policies.

8 · Adjuster work queue

Where an adjuster's day starts.

Decision

Approving requires an indemnity amount within your authority; a rationale is recorded for both outcomes.

Indemnity amount (£)

0.00

Rationale

Required for approval and denial

Approve

Deny

- Decisions above the adjuster's authority limit are blocked and must be escalated.
- Every action lands in an append-only audit trail that nobody can edit or delete.
